## Truma Mobile Service Techs Offering AquaGo Installations at Winnebago Grand National Rally

Elkhart, IN – For the fourth consecutive year, Truma is happy to support the WIT Club and Winnebago Industries as they celebrate 60 Years as an American icon during their annual Grand National Rally (#GNR). The event takes place on Monday, July 23 – Saturday, July 28 in Forest City IA.

Truma will continue the unique and fun “Trumafest” where attendees are invited to join the Truma team for good food, drinks and laughter on Wednesday, July 25 at 5:30pm.

A first this year, Truma will have a Mobile Service Technician on the grounds for the week to support service of the Truma Combi. The Mobile Service Technician will also provide installation and service of the industry leading, on-demand hot water system, the Truma AquaGo.

The Truma AquaGo provides state-of-the-art engineering with a patented mixing vessel to ensure constant temperatures and is the only system in the industry to allow for decalcification, ensuring a long life for your investment. Winnebago Industries uses the Truma AquaGo as their exclusive on-demand water heater and the Truma Combi also comes standard on many models.

To schedule an appointment to upgrade your water heater to the Truma AquaGo, stop by the Truma booth #25. Make sure to take advantage of our pre-show \$250.00 flat rate installation special. Installations will be scheduled on a first come, first served basis.

Join us this July, drop by our booth #25 in the hall and say hello to the Truma Team!
