

## Transportation Rules for the Rally Grounds

To ensure the safety of everyone on the rally grounds during pre-rally and the Grand National Rally, here are the rules for transportation:

- During pre-rally and rally week there will be no car parking by your RV or in the medians and grass areas near the access roads, except in designated areas. You will be required to park in the car parking areas only.
- The main mode of transportation on the rally grounds during this time period will be gas or electric golf cars, electric mobility scooters with three or four wheels, two-wheeled Segways, bicycles, or the people movers.
- Only electric mobility scooters with three or four wheels will be allowed inside the buildings, tents, and pavilions.
- Gas scooters and motorcycles may not be used on the main boulevard, John K. & Luise V. Hanson Blvd., or any blacktop areas. They may be used to enter and exit the rally grounds only.
- Three- and four-wheeled ATVs, Gators or Kubota- type vehicles will not be allowed to be driven for transportation on the rally grounds in any area. The only exception will be for Winnebago staff or other authorized usage.
- All vehicles must obey the 5-mph speed limit on the grounds. Vehicles must be driven on the correct side of the road as posted. The walking traffic is also walk on the correct side of the road you share with the above vehicles. Walking traffic has the right of way.
- Vehicles, other than RVs returning from service escorted by our parking team, are not allowed to travel the main boulevard at any time. Other exceptions will be for our Winnebago Maintenance or Service team which will have a special vehicle pass.
- The blacktop boulevard is for pedestrians, golf cars, and people movers. Please pay attention to the signs at both ends of the boulevard and travel in the right direction. The south street is for going to Friendship Hall and the north street is for heading towards River Oaks. Walkers are on the outside of the one-way and golf cars and propelled vehicles on the inside of the one-way. Again, please remember that walking traffic has the right of way. Anyone operating vehicles on the grounds must have a valid driver's license.
- Please do not pass the people movers when loading and unloading. People movers are in operation for those who would like or need a ride. They will pick up riders and return riders to their head of row. Please do not park where you would block access to or transportation of the people movers.
